

M&A AT A GLANCE

APRIL 2025 | ISSUE 155

Key Takeaways

- Deal counts fell in March but total deal value saw big gains compared to February. U.S. and global deal values were up 144% and 119%, respectively, while total deal counts fell 32% and 22%, respectively. This was driven in part by the announcement of significantly more \$1 billion+ deals involving a U.S. target in March—42 compared to 25 in February.
- Year-over-year (YOY) data also reflected these trends, with U.S. and global total deal values up 149% and 128%, respectively, and total deal counts down 38% and 31%, respectively.
- Computers & Electronics was the leading U.S. industry by total deal value and deal count in March and for the last 12 months (LTM).
- U.S. inbound and outbound crossborder activity reflected the broader trend, with total deal values increasing and deal counts decreasing, both as compared to February and YOY. Japan led inbound activity by deal value in March and for the LTM. Canada led by number of inbound deals LTM and tied with the United Kingdom for the most March inbound deals. Hong Kong (China) led by outbound deal value in March, while the United Kingdom led LTM, as well as by number of deals in March and LTM.
- Among definitive \$100 million+ U.S. public deals announced in March, interesting observations include the following:
 - The average reverse break fee (4.7%) was below the LTM average (5.8%); and
 - Of the 14 deals announced, the two financial deals announced both had go-shops.

Endnotes

- Industries categories are determined and named by Dealogic.
- Based on the highest target break fees and reverse break fees payable in a particular deal.
- There were 14 transactions in March 2025.
- Financial and strategic categories are determined by Deal Point Data.
- Eight transactions in March 2025 had a reverse break fee.
- Two transactions in March 2025 involving a financial buyer had a reverse break fee.
- Six transactions in March 2025 involving a strategic buyer had a reverse break fee.
- Two transactions in March 2025 involved a financial buyer.
- Twelve transactions in March 2025 involved a strategic buyer.
- Two transactions in March 2025 had a go-shop provision.
- Two transactions in March 2025 involving a financial buyer had a go-shop provision.
- No transactions in March 2025 involving a strategic buyer had a go-shop provision.
- Due to rounding, percentages may not add up to 100%.
- This data includes both announced transactions for which a definitive merger agreement was reached and filed and those for which a definitive merger agreement was never reached and filed (including withdrawn transactions).
- Unaffected Premium % indicates the difference between the current price per share offered as consideration in the transaction and the "unaffected price," reflected as a percentage. The "unaffected price" is the target's closing stock price on the date that is one calendar day prior to the first public disclosure regarding a potential deal involving the target and on which the target's stock price was unaffected by the news of the deal.
- Each of Ireland, Italy, Saudia Arabia, South Korea and Switzerland was the country of origin for three transactions in March 2025.

The charts on pp. 1–2 and 5–9 were compiled using Dealogic and are for the broader M&A market, including public and private transactions of any value. Deal volume by dollar value and average value of deals are calculated from the subset of deals that include a disclosed deal value. The charts on pp. 3–4 were compiled using Deal Point Data and include acquisitions seeking majority or higher control of U.S. targets valued at \$100 million or higher announced during the period indicated and for which a definitive merger agreement was reached and filed (except with respect to data regarding premiums and hostile/unsolicited offers, which is for all announced deals). "Last 12 Months" data is for the period from April 2024 to March 2025, inclusive, and "year over year" data compares March 2024 and March 2025. Data obtained from Dealogic and Deal Point Data has not been reviewed for accuracy by Paul, Weiss.
